PROFESSIONAL SUMMARY

Java Full-Stack Developer with hands-on experience building responsive web applications and backend systems using Java, Spring Boot, JDBC, MySQL, and JavaScript. Skilled in REST API development, database design, and Agile collaboration. Proven ability to deliver clean, maintainable code through Controller-Service-Repository architecture and OOP best practices. Seeking to leverage strong problem-solving skills and full-stack development experience in a Software Engineer role.

TECHNICAL SKILLS

Languages: Java, SQL, HTML5, CSS3, JavaScript

Frameworks & Technologies: Spring Boot, Spring Data JPA, Hibernate, JDBC, REST API, Spring Security, JWT, React, Bootstrap, Maven, OOP, Data Structures & Algorithms

Database: MySQL, SQL Query Optimization

Tools & Platforms: Git, GitHub, VS Code, IntelliJ IDEA, Postman, DBeaver, Antigravity

Core Competencies: Problem-Solving, Team Collaboration, Communication, Time Management, Debugging & Testing

PROFESSIONAL EXPERIENCE

Web Developer Intern — Octopyder Service

Jun 2024 – Oct 2024

Jaipur, Rajasthan

- Developed responsive, cross-browser web pages using HTML, CSS, Bootstrap, and JavaScript, improving usability across desktop, tablet, and mobile devices.
- Built and maintained reusable frontend components, streamlining development workflow and ensuring consistent UI across multiple pages.
- Implemented interactive JavaScript features that increased user engagement and improved overall frontend functionality.
- Collaborated with a cross-functional development team in an Agile environment to test, debug, and resolve UI/UX issues, improving page reliability.

PROJECTS

AI-Powered TV E-Commerce Platform *Spring Boot, React, MySQL, Spring Security, JWT, REST API, Google Gemini AI*

- Built a full-stack television e-commerce platform with Spring Boot, React, and MySQL, covering product browsing, cart, wishlist, orders, checkout, and admin management.
- Integrated Google Gemini AI into a TV Shopping Assistant with text and voice interactions for product search, filtering, comparison, and recommendations.
- Enabled AI-driven multi-step actions for cart, wishlist, and order management through controlled tool-calling against existing backend services.
- Secured customer and admin operations with Spring Security, JWT authentication, role-based authorization, and order ownership validation.
- Delivered AI-powered admin analytics, including revenue insights, best-selling products, and low-stock monitoring, from real database data.

Hotel Reservation System *Core Java, JDBC, MySQL, OOP*

- Developed a Hotel Reservation System in Java using JDBC and MySQL to manage room bookings and guest records.
- Implemented complete CRUD functionality for reservation creation, update, deletion, and retrieval, streamlining booking operations.
- Applied OOP principles to design modular, reusable classes for reservation handling and customer management, integrating JDBC connectivity with optimized SQL queries.

E-Learning Course Platform *HTML, CSS, Bootstrap, JavaScript*

- Developed a responsive course-selling website using HTML, CSS, Bootstrap, and JavaScript to showcase and promote online courses.
- Designed interactive pages for course listings, pricing, and enrollment workflows with a clean, user-friendly interface.
- Built reusable frontend components and implemented dynamic UI behavior with JavaScript, improving interactivity and navigation consistency.

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science and Engineering

Jun 2026

Vivekananda Global University (VGU), Jaipur, Rajasthan | CGPA: 7.89 / 10.00
